

NEW!

2007 Winter Order Form

Terry Lauderdale - Heathen - Hot For Teacher- "I'm hooked. I love the strings! They felt great, great tone and most of all, they didn't break. The reason I point that out is that I play very hard and pull up all the way on my Floyd Rose tremolo quite a bit and the Sfarzo's never gave in!"

Geoff Thorpe - Vicious Rumors "These strings are great. I am proud to be working with Sfarzo Strings."

VICIOUS RUMORS NEW C.D. "WAR-BALL" has just been completed.

"WARBALL" is the ninth studio album and twelfth official release. Produced by Geoff Thorpe and Juan J. Ortega.

Thaen Rasmussen - Vicious Rumors "These strings are dynamite. Keep a fire extinguisher on hand " Thaen has been a fixture on the S.F. Bay Area Metal scene for over 20 years. He has charged through a succession of hard-rockin' bands including Anvil Chorus, Control, 88Magic, Spy vs. Spy, Porcelain and Black Sun.

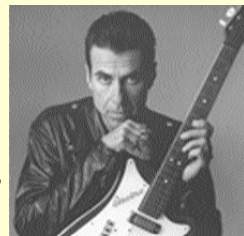

Dario Lorina - Currently touring with The Jani Lane Band. "I am completely blown away. They beat ___ any day, tone wise and feel. They are absolutely killer. They are the best strings I have tried"

Dario's instructional video "Rock Begins" is now complete. Dario is a 16-year-old guitarist from Boston, Massachusetts who started taking private lessons at the tender age of six.

Tony Balbinot - The Cadillac Angels "I used to change strings after every show to avoid breakage and dull tone, but Sfarzo strings really hold up better than any guitar string I've tried."

Sonoma California - Made in the U.S.A.

The Challenge: Your frets can act like a file causing radical wrap separation. There are several things to consider when making a guitar string. One must consider how large the core is in relation to the size of the outer wrap. The difference between them will determine how fast the string will break down due to fret ware.

Reality: The core can be essential with electric guitars because the core is generally made from steel. The wrap is usually a nickel alloy and virtually non-magnetic. Your pickups pickup the steel core wire for output, so the bigger the core wire then the louder the string. However, too much core and your strings would most likely begin premature wrap separation.

The Solution: SFARZO STRINGS are designed so that the wrap has a superior grip on the core wire, therefore less chance of wrap separation. Allowing a tighter wrap winding is also responsible for a longer tone quality lifes pan. This process reduces the chance of acid from your sweaty hands getting onto the core wire which causes oxidation and literally rots the string from the inside out.

Sfarzo Super Screamers™ are made from a Nickel Alloy, creating an outstanding Rock and Roll String.

S.F.T. (Superior Formulated Tone)™ strings are a Nickel / Iron combination that results in a very powerful tone while achieving a bright output sound. Sustain is fantastic.
